October 2006

Nexus Telecom Newsletter

Dear Reader,

Welcome to the October 2006 issue of the Nexus Telecom Newsletter. More and more, Nexus Telecom is operating on a global scale. The latest successful acquisition of new projects is proof of our global presence. What is it that we can do for you? Don't hesitate to [contact us](#), or speak to us personally at one of our upcoming events!

Best regards, Nexus Telecom.

News Stories

Nextel Chile secures launch of GSM services with NexusNETVIEW by Nexus Telecom

The Nextel group offers telcom services in Mexico, Brasil, Argentina and Peru. With their newest startup company Nextel Chile, the group is expanding their activities,

launching competitive GSM services in Chile. The successful introduction of these services is secured with the help of NexusNETVIEW for the monitoring and management of interconnection traffic to other carriers.

Nextel is known for their competitive services with a high price/benefit ratio. Services include GSM Voice but also 2-way radio features, making Nextel especially attractive for corporate fleet customers.

DiGi automatically configures mobile handsets with the help of NexusNETVIEW

Often mobile users cannot make use of services due to an incorrect or incomplete configuration of their handset. DiGi has solved this problem with the help of NexusNETVIEW. NexusNETVIEW detects whenever a DiGi subscriber uses a new handset and ensures that a corresponding configuration message is automatically sent to this handset so that all services are fully enabled for the mobile user.

With this DMS solution (Device Management System), DiGi increases customer satisfaction greatly. Furthermore, DiGi substantially increases service revenues since mobile users now will really use the

Highlights
